FIRE & SAFETY

Dear Residents,

We wish to remind you that due care and caution must be exercised while using the electrical appliances/kitchen range/lighting candles/ smoking cigarette / diyas etc. as any negligence in this regard might lead to a serious fire hazard.

We would urge the residents to be careful and check for any loose connections or defective wiring, and get it rectified on priority. Kindly explain fire hazard possibilities and use of appliances etc. to domestic staff and advise them to be vigilant and inform the resident, in case they are aware of loose connections / faulty wiring/malfunctioning appliances etc.

Cigarette butts are often strewn in common areas / resident balconies, coming from higher floors. This can be a serious fire hazard as well.

In case of any smoke/fire or any other incident, immediately contact security control room at Extn. 6000 or use Manual call point (MCP) which are affixed on each floor. You may simultaneously contact the Sr. Estate Manager as well. Please find the below-mentioned tower wise details for your reference for the location of Fire Extinguishers along with the link to its basic operations.

| Tower | Fire Extinguisher Location |
|--------------|---|
| A | Affixed in the staircase of each floor |
| B | Affixed in the staircase of each floor |
| C | Affixed in the staircase of each floor |
| D | Affixed near the service lift on each floor |
| E | Affixed near the service lift on each floor |

We thank you in anticipation for your understanding and cooperation.

Regards,

Team Helpdesk
