## WASTE SEGREGATION PROCESS

Dear Residents,

As mandated by Municipal Corporation of Gurugram, we wish to remind the residents that the waste has to be segregated at source into three categories - namely Wet, Dry and Domestic Hazardous.

At Belaire, the household and common area waste has to be segregated into the below mentioned categories-:

- **Biodegradable (WET) Waste:** To be collected in a bin (without plastic liner).
- **Non-Biodegradable (DRY) Waste:** To be collected in a bin without plastic liner).
- **Domestic Hazardous Waste:** To be wrapped in paper and collected in a bin.

Residents are requested to ensure and inform their domestic help not to keep the waste Bins in the staircase or outside the apartment. It should be handed over to the Housekeeping staff during daily waste collection.

We thank you in anticipation for your understanding in this regard.

Regards,

**Team Helpdesk**
